Course Comments

- I feel like all SPED classes need to be more like the general education classes. I feel very unprepared in the collaborative side, but more prepared for the general education side.

- The one thing I wish was better is the Methods and Materials for Teaching Math. I wish we had more time in this classroom because it's such a big part of the student's education. Math is also changing everyday [sic], so learning some of the strategies that they are learning would be incredibly helpful.
- Pre-internship block in many ways was good, but also more than required preparation wise when it came to the placement. I think more time in those classes rather than placement, would be more beneficial in the future. Also I know time in placement is the best method of learning, but all of these placements are honestly too long to go working without pay. If someone still have bills to pay, this program weighs heavily on them financially.

Question Comments

What aspects of your internship did you feel most prepared for? Explain.

- General Education. I feel like reading is the subject I am most prepared for reading, then math, then science, then history.
- I was the most prepared for teaching in the classroom. I have had a lot of experience in the past few semesters with getting in front of the students and feeling confident.
- Lesson Planning
- Standards!
- I felt prepared and confident to teach any lesson and/or deal with many different behaviors/developmental delays/disruptive behaviors.
- I was extremely prepared to teach the students. Even though I was in a new classroom with a new teacher, I felt confident in myself so far that I could teach the lessons to the students.
- Lesson Planning

What aspects of your internship did you feel least prepared for? Explain.

- I feel like the collaborative side is what I am least prepared for. I feel like all of the classes were jammed into the summer and in a month. I feel like this is a very important section to cover, but it was very rushed. I would like some of these classes during the regular class time.
- The special education side of the internship has been tougher for me because of the placement I'm in, and there are a lot of gaps in what the classes teach and what is happening in the classroom.
- SPED requirements
- Classroom Management!
- Throughout internship, I never felt as though I was not prepared or able to handle certain situations.
- I'm not entirely sure right now. The only thing I can think of is that my first placement was a little difficult because of the teacher I was placed with.
- Classroom management
