Course Comments

- **EDF 580 Adv Human Growth & Development** - From what I remember, information relevant to education that I learned in this class was also covered in ED 581 Adv. Methods & Materials in ECE.

Question Comments

What aspects of your internship did you feel most prepared for? Explain.

- Collaborating with my CT to develop appropriate lesson plans, teaching in the classroom, building rapport with students, faculty, and staff, and classroom management.
- I was most prepared for spending time in the classroom. The amount of time spent in lab placements during the other semesters was extremely beneficial.
- I felt fairly prepared for the edTPA portion!
- I felt the most prepared for lesson planning because I had access to resources to help me plan lessons and activities, and I practiced with a template that helped me think about different parts of the lesson including assessment.

What aspects of your internship did you feel least prepared for? Explain.

- Teaching in a whisper. Although we have gone back and forth on this aspect of teaching in my CT's classroom. I am required to whisper to students when teaching during small group instruction.
- I was least prepared for filming and gathering data for edTPA in the classroom. I felt unprepared for aspects of the filming process. Managing the real world problems of gathering data for these tasks was difficult. I feel that Methods block of the program should require filming and more rigorous data collection.
- I wish that a few full days of teaching had been required in prior student teaching experiences. It was something that was a little nerve racking preparing myself for in the beginning.
- I felt prepared for my internship. I can't think of anything I didn't feel prepared to do. I did feel a little unprepared for edTPA. It would be hard to replicate the process to practice/prepare in semesters prior to internship but maybe provide more knowledge of what we would have to do and what all it entails.
