## Truck Driver Safety Training

This instructor-led classroom course was specifically created to address the unique challenges truck drivers face. It provides truck drivers with defensive driving strategies and techniques that will help them avoid collisions and traffic violations.

## Flexible and convenient

Whether you need to train a fleet of drivers, a small group at a remote area or construction site or provide a refresher course, NSC Professional Truck Driver Courses fit any training schedule or learning style. Classroom training can be conducted at our facility or yours. Help your drivers operate with the greatest skill and efficiency to protect your business from financial liabilities and costs associated with collisions.

## Protect your organization with driver safety training

Keep everyone safe on the road by providing the most effective training available. The National Safety Council started training drivers in 1964 and they've been refining and updating their courses ever since. Count on them for training that addresses current safety issues, technology and societal factors that affect driving behaviors.

The Alabama Traffic Safety Center at the University of Montevallo serves the State of Alabama through the delivery of training, educational programming and technical assistance in the areas of driver, motorcycle and other traffic-related topics.

## What employees learn:

The NSC Professional Truck Driver Course teaches proven collision prevention techniques through scenario-based training, hazard recognition reenactments and crash avoidance procedures in a variety of driving situations, road and weather conditions and environments.

## Course features:

- Highly-effective, scenario-based training methods integrating hazard recognition and skill-building techniques into the multimedia presentation.
- Best practice strategies to help participants learn safe and legal alternative choices when dealing with hazardous situations and risky driving conditions.
- Knowledge checks, session reviews and a final exam to validate retention.
